

I am commenting on the possibility of K-LOVE radio being over-ridden by a low power FM station. My family and I enjoy the music and the other programming provided by K-LOVE. We also feel that they are beneficial to the community as they give public service announcements for concerts and other events of interest. There is not an alternative station in our area that offers the same family freindly mix of programming that we find on K-LOVE. We request that you not allow it to be replaced by a low power FM station.
